## Infrastructure Cloud Connect and ProjectWise

Are you doing any of the following...?

- Accessing ProjectWise Explorer?
- Editing CAD Files?
- Creating Clash test?
- Managing forms?
- Administering datasources?

No  
→

**Bentley Infrastructure Cloud  
Connect**

New Functionality:

- Create and manage iModels
- Carbon calculation
- Mobile app
- Visualise clash results

Replaces old entitlements:

- ProjectWise Manage
- Synchro Field

Existing Functionality:

- Create and manage projects
- Manage team
- Manage external organisations
- Manage settings
- Model viewing
- Reporting
- View Insights
- Maps and GIS
- View reality data
- Model federation from OpenX apps

Yes  
→

**Bentley Infrastructure Cloud  
ProjectWise**

New Functionality:

- Create / manage clash tests
- Create and configure forms
- Construction tracking
- Advanced Civil Tools
- Model conditioning
- Enterprise data
- Visualisation of planned schedules
- Manage Power BI dashboards
- Extract & curate reusable components

Existing Functionality:

- All of BIC Connect ...and also..
- ProjectWise Explorer
- Configure Insights
- Export iModel to IFC

Replaces old entitlements:

- ProjectWise Validate
- ProjectWise Engineer
- Synchro Control

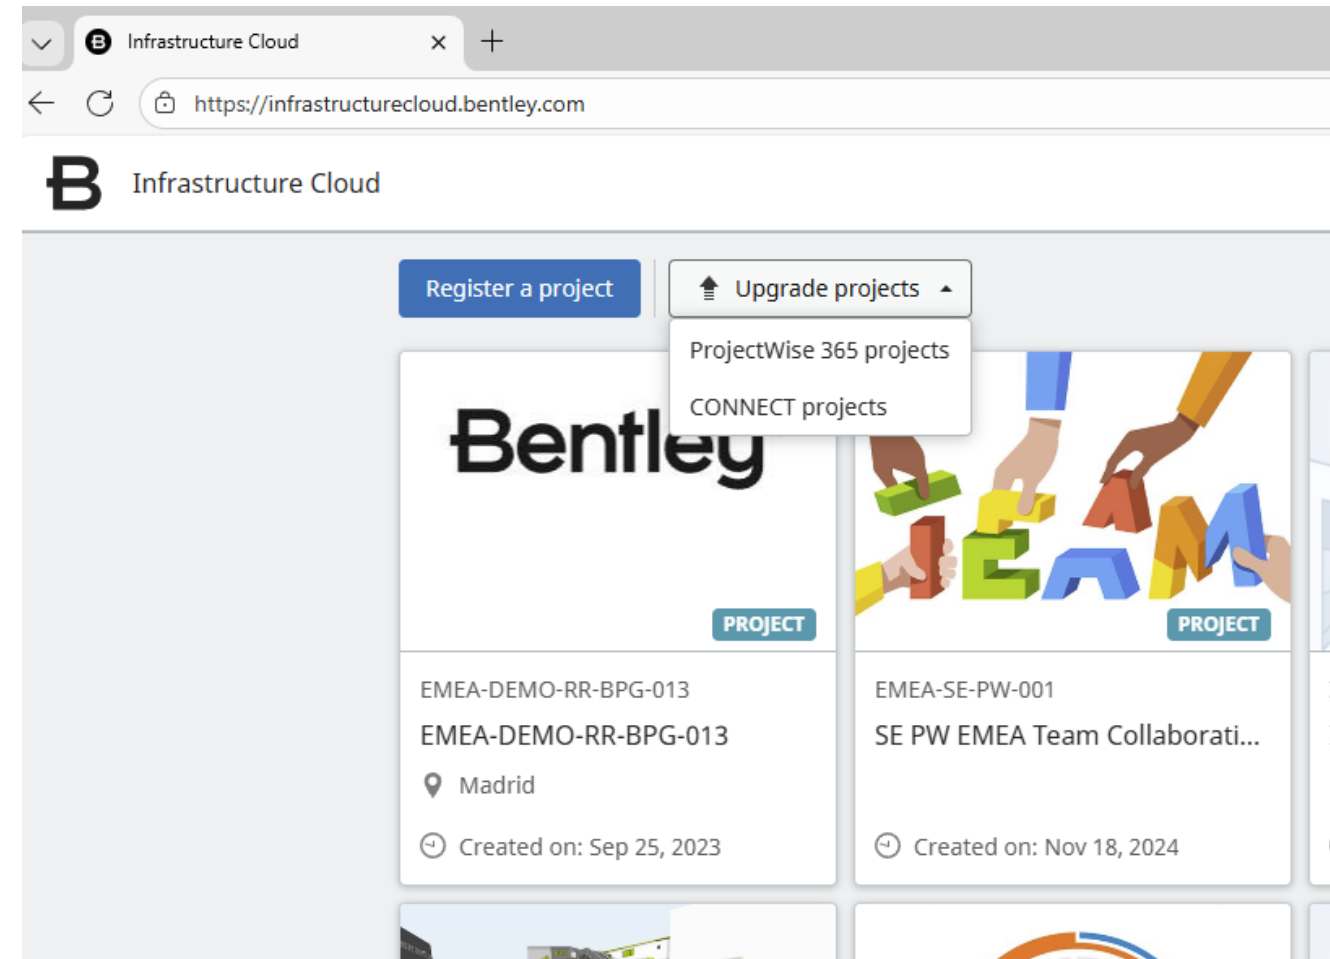

[Detailed Features and Capabilities](#)

# 02 Bentley Infrastructure Cloud

# Upgrade to Bentley Infrastructure Cloud

## Bulk upgrade of ProjectWise 365 and Connect projects

- Connect.bentley.com projects can be opened directly on infrastructurecloud.bentley.com without conversion
- Bulk upgrade available for ProjectWise365 and connect.bentley.com
- Up to 1000 projects at a time

# Global Search

## Documents, Forms, iModels, Media

The screenshot displays the Bentley Infrastructure Cloud interface. At the top, there is a search bar with the text "Search any datatype across all projects or assets". Below the search bar, there are navigation options: "Register a project", "Upgrade projects", "Recent", and "My projects". The main content area is a grid of project cards. Each card includes a thumbnail image, a project ID, a project name, a location, and a creation date. The cards are as follows:

Project ID	Project Name	Location	Created on
KB_BSY_01	KB_BSY_PROJECT	Elon	Jan 14, 2025
EMEA-ENGINEERING-2026	MetroStation DCW2026	London	Apr 26, 2023
EMEA-COLAB-SE-EXT-001	Project for sharing with users		Apr 16, 2025
TMC-USER-2026	TMC-USER-2026		May 21, 2026
OBE 2026.01.01-009	OBE 2026.01.01 - Datacenter	Wilson, NC	Jan 27, 2026
172769	Aberdeen to Central Belt	Aberdeen to Scottish Central Belt	Aug 31, 2021
EMEA-SE-PW-001	SE PW EMEA Team Collaborati...		Nov 18, 2024
P202244_D	I95 and SH97 Highway Improv...	Wilson	Aug 8, 2024
Psteknik-PoC-2026	Psteknik-PoC-2026	GeoLocation	Jun 11, 2026
7574987456	CAD Connect POC 2026		Jun 2, 2026

At the bottom of the grid, there is a button labeled "All projects >". The footer of the page contains the text: "© 2026 Bentley Systems, Incorporated | Terms of Service | Privacy | Terms of Use | Cookies | Legal Notices".

# Export data to CSV

## Generate data for reporting directly from the web

- Document list can be exported to Excel with the applied View
- Works for Folders and Searches

The screenshot shows the Bentley Infrastructure Cloud interface. The top part displays a document list with columns for Doc ID, Folder name, Name, and State. An 'Export table data' dialog box is open, showing a file name 'content check.csv'. Below the dialog, an Excel spreadsheet is open, displaying the same data from the document list. A green arrow points from the dialog box to the Excel spreadsheet, indicating the data transfer.

Doc ID	Folder name	Name	State	Revision	Design Sta	Out to	File Updat	File Size	File Name	Updated	SEC_CODE	Object GUID	Description	URLLink

# Markup Tool

## Microsoft Office files

Microsoft Office files can be directly opened in the Markup Tool

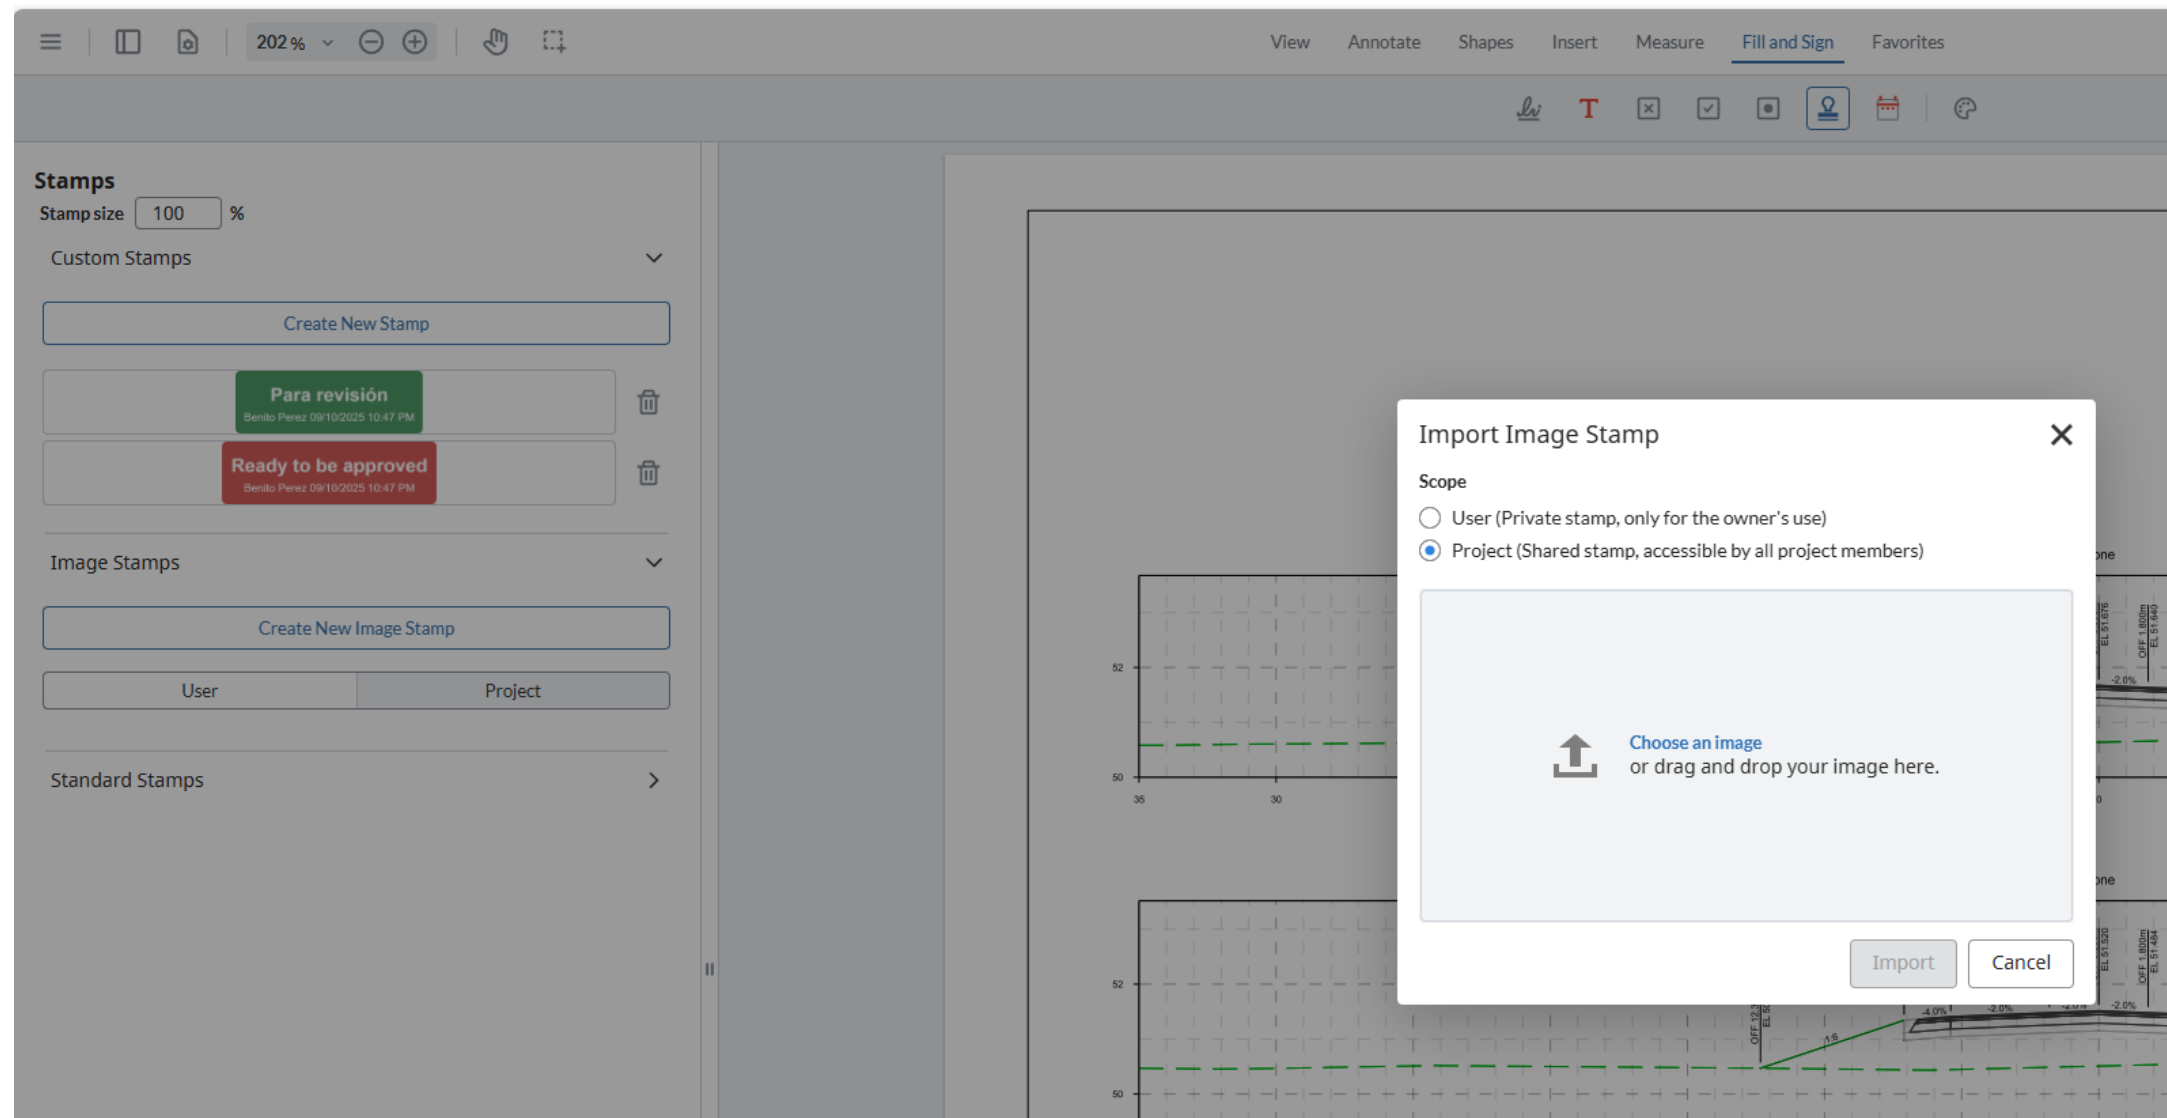

- Word,
- Excel,
- PowerPoint

The screenshot shows the Markup Tool interface with a table of project tasks and a sidebar for markups. The table has columns for task name, description, duration, slot, and other identifiers. A red scribble is present over the 'Workspaces' and 'Renditions' rows. The sidebar on the right shows two markups by Benito Perez, each with a 'Create Issue' button.

# Markup Tool

## Project stamps

# Markup Tool

## Semantic and visual comparison

The screenshot displays the Bentley ProjectWise Markup Tool interface. On the left, a sidebar shows a list of documents with version history. The main workspace is split into two panes. The left pane displays a document titled 'Local Disc Space' with text explaining the local document workflow and its limitations. The right pane shows a document titled 'Step 1 - Import Configuration Data Files into ProjectWise' with a tree view of configuration files. A 'Changes List' on the right side of the workspace shows three changes: 'Text Content - Insert' (0), 'Text Content - Insert' (+234), and 'Text Content - Insert' (+309). The bottom right of the workspace shows a cross-section diagram with a grid and various annotations. A small 'Alignment tool' dialog box is overlaid on the diagram, featuring a 'Reset' button, 'Scale %' (100), 'Step size' (10), and navigation arrows. A green arrow points to the 'Alignment tool' dialog box.

**Local Disc Space**

Once project documents are local, the exchange between the ProjectWise server and the user's computer is done using delta file transfer. Delta file transfer is a ProjectWise technology that improves performance when sending large files over networks by only sending the changes needed to update the file, rather than the entire file. Use the Local Document Organizer dialog in ProjectWise Explorer (**Tools > Local Document Organizer**) to view the managed configuration documents that have been downloaded from the server.

**Limitations**

- The Workspace and WorkSet configuration files must be included in the ProjectWise managed configuration. Meaning, the CONFIGURATION (root)/WORKSPACE/WORKSETNAME along with the associated configuration files must be stored in ProjectWise.
- The Managed WorkSets and Sheet Sets require access to the file. It is currently recommended that you store the .dgn files outside of the managed configuration. This can be done by setting the variable, \_USTN\_WORKSETSDGNWROOT to a shared location outside of ProjectWise. This is described in Step 3 - Create Configuration Settings Blocks
- The Managed WorkSets and Sheet Sets require access to the file. It is currently recommended that you store the .dgn files outside of the managed configuration. This can be done by setting the variable, \_USTN\_WORKSETSDGNWROOT to a shared location outside of ProjectWise. This is described in Step 3 - Create Configuration Settings Blocks

**Step 1 - Import Configuration Data Files into ProjectWise**

- Open ProjectWise Administrator and login to your datasource.
- Expand the WorkSpaces datasource node, then right-click **Managed** and select **Import Managed Configuration**.

## Tech preview: Item Types and Titleblock integration

- This release supports attribute exchange with item types for titleblock updates.
- At this time, attribute exchange is supported with the **File > Open** command in this technical preview.
- The following commands do not support attribute exchange:
  - Copy out
  - Export
  - Check out.

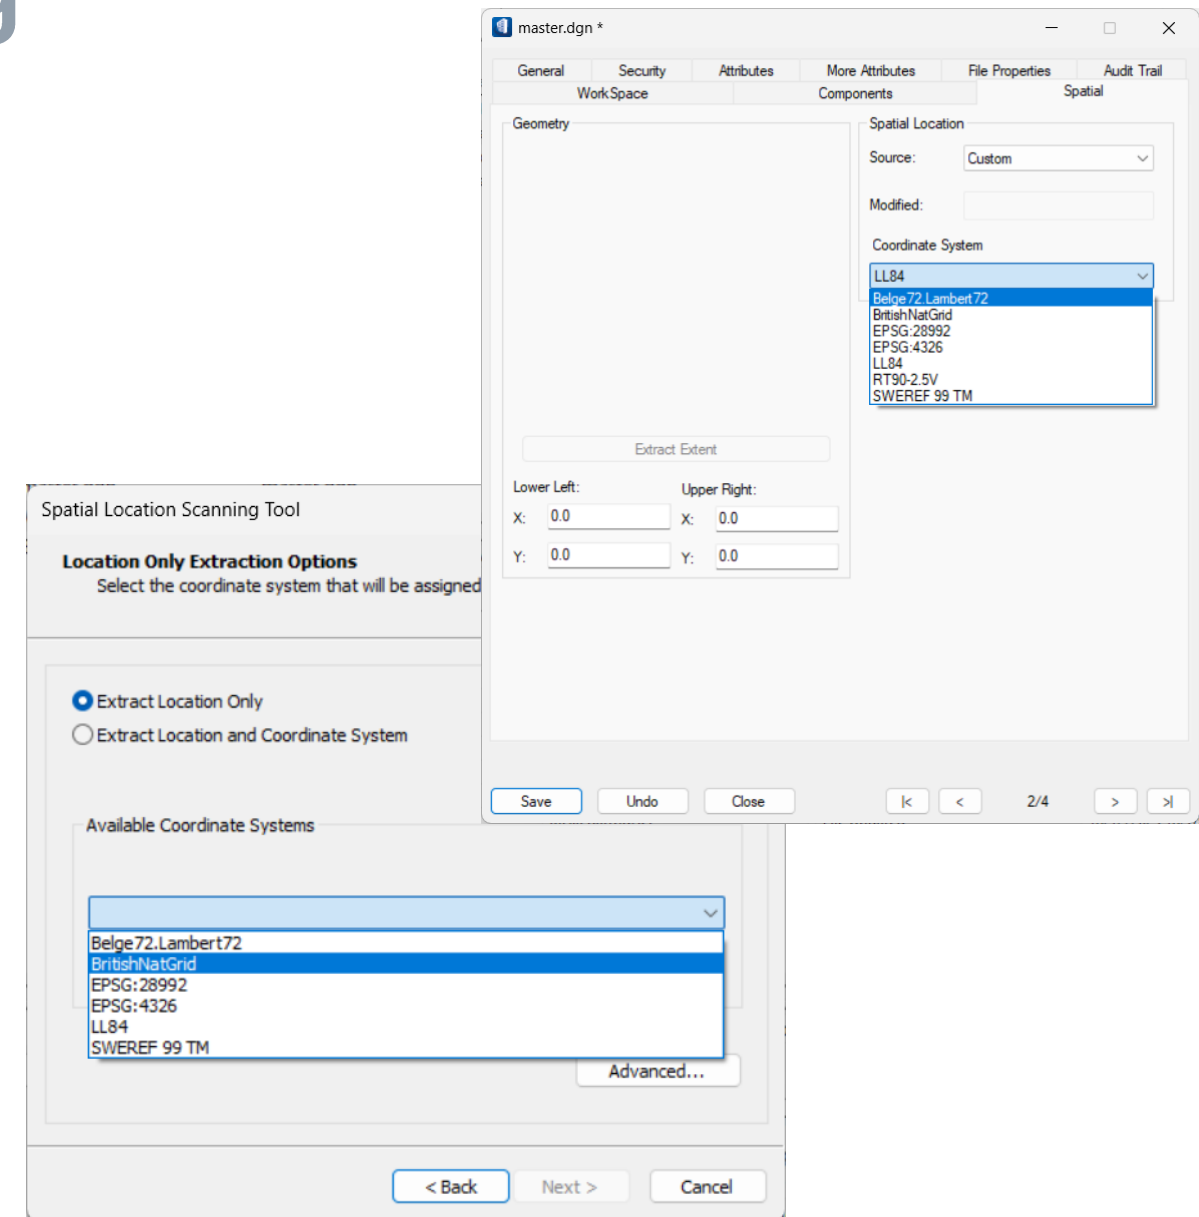

The screenshot displays the 'Attributes' tab in the ProjectWise Explorer interface for a drawing document. The document ID is 122334-BEN-00-XX-DR-A-00005. The interface includes a navigation bar with 'Details', 'Audit trail', 'Attributes', and 'Document code'. Below the navigation bar, there are icons for editing, undo, and redo, along with a 'Document Attributes' dropdown menu. The main content area is titled 'Drawing and Model Attributes' and contains several input fields for metadata:

Attribute	Value
Asset/Project	122334 EMEA-DEMO-DCW-2023
Originator	BEN - (Bentley System) Bentley Systems (UK) Ltd
Zone/Asset	00 All zones
Level/Location	XX - (No Levels Applic) No Levels Applicable
Type	DR 2D Drawing
Role	A
File Number	122334-BEN-00-XX-DR-A-00005

# ProjectWise Explorer

## Tech preview: Spatial Scanning

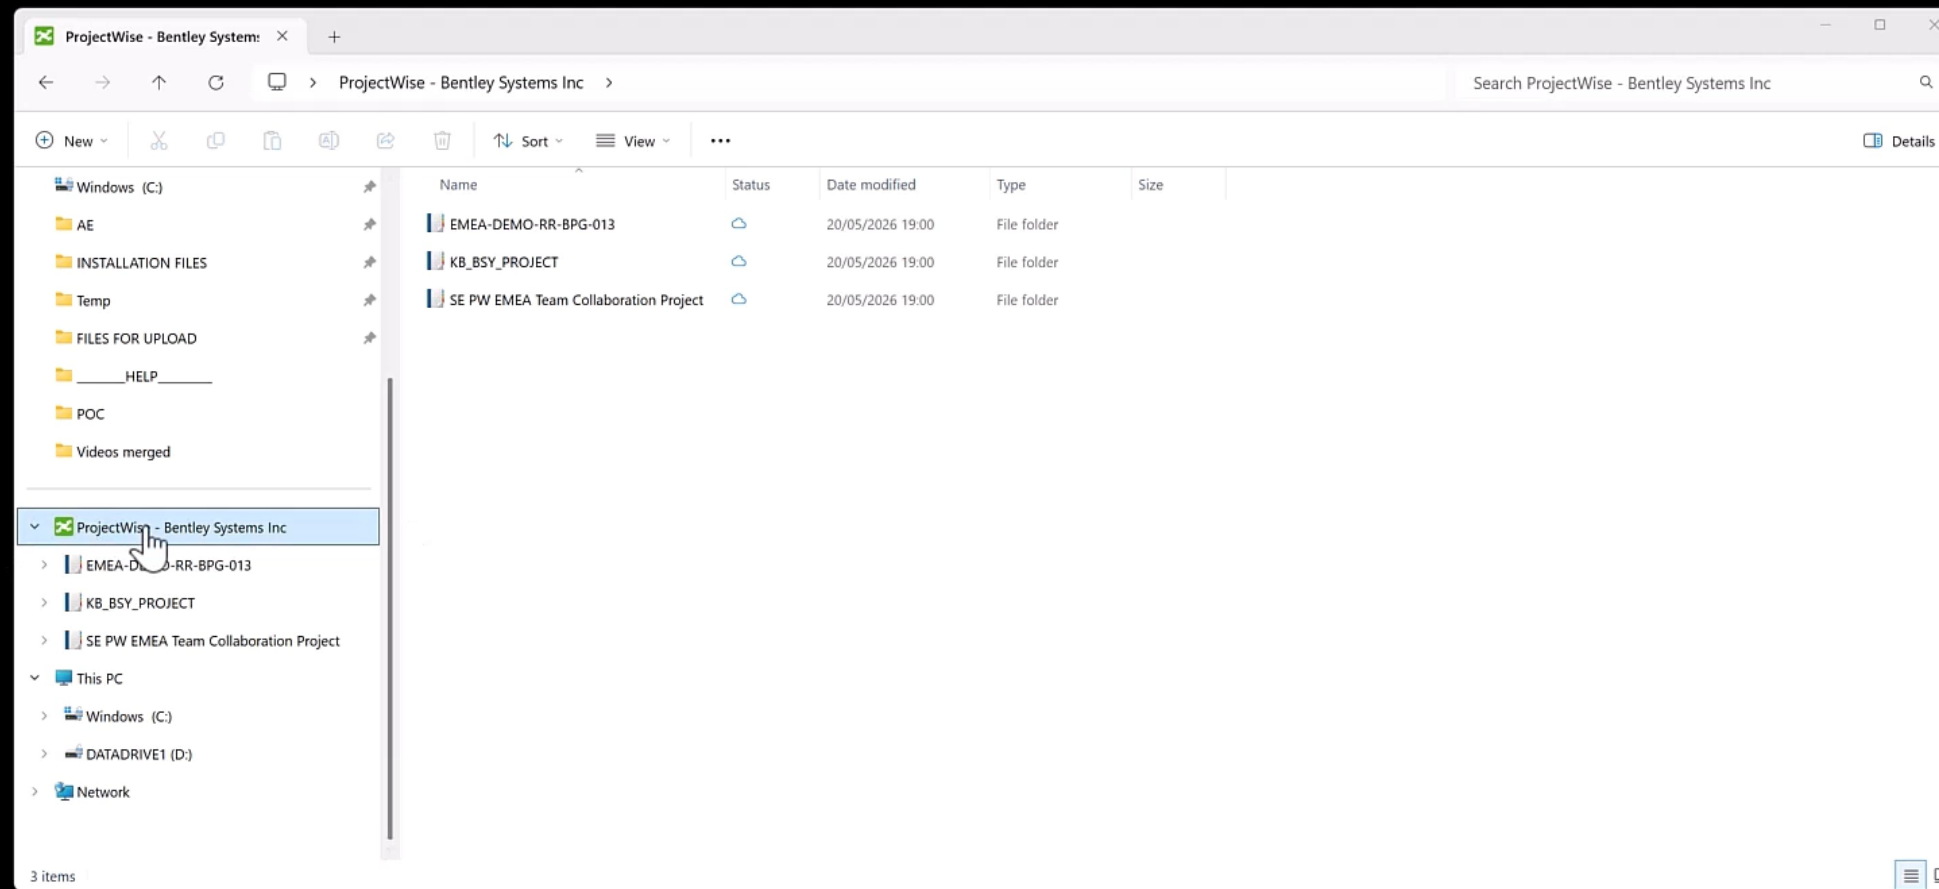

- Spatial Scanning Technical Preview
- ProjectWise Explorer re-introduces a feature that adds spatial context to documents and folders in a ProjectWise data source.
- scan and extract coordinate system data using the Scan for Spatial tab in Document Properties.
- Note: Spatial scanning requires a minimum of ProjectWise Integration Server version 2023.00.00

# 04 ProjectWise Drive

# ProjectWise Drive

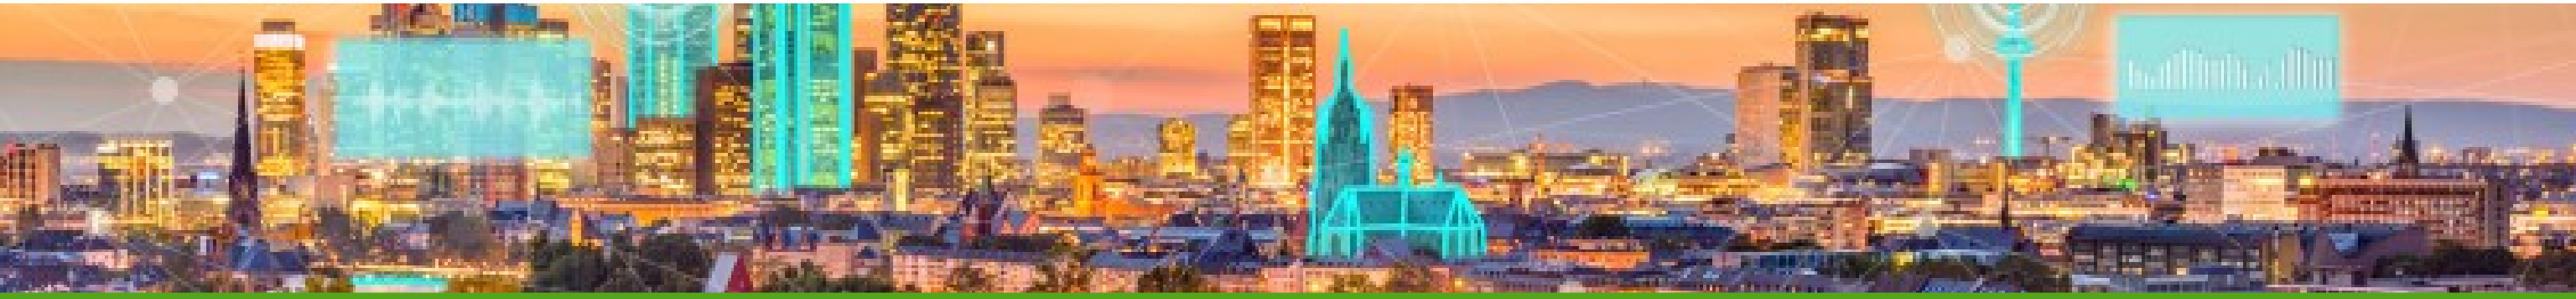

- Unified Sign-In with Connection client
- Workflow state change
- Local Document Organizer
- Improved Metadata Display
- Auto-Displayed metadata in File explorer: Description, Version number, state
- Performance improvements on large projects.
- Get link
- Options to co-authoring or open as read only
- Warning when deleting files
- Upload status indicators

# 05 ProjectWise Design Integration

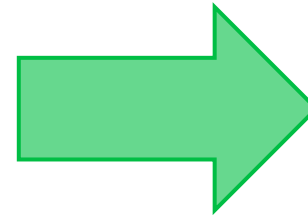

# ProjectWise Cloud

A cloud-first evolution of your ProjectWise deployment

## Managed Service Hosting

- Lengthy upgrades impacts productivity
- Infrequent upgrades prohibit agility
- Outdated software introduces risk and compliance issues
- Limits innovation

## ProjectWise Cloud

- Stay current with automated, zero-downtime updates
- Fuel continuous growth with frequent updates
- Drive quality and security with evergreen software
- Benefit from ProjectWise Cloud exclusive capabilities
- Enhanced monitoring

# ProjectWise Design Integration

## Integrations

- **ProjectWise Explorer 2024 no longer supports MicroStation v8i.**

For more information, see the following Bentley Communities announcements:

[KB0024985 - V8i Support Policy Deprecation Announcement](#)

[KB0109786 - V8 DGN File Format Compatibility.](#)

- **New integrations**

- AutoCAD 2026, Civil 3D 2026, Revit 2026, Plaxis

# ProjectWise Design Integration

## Oracle support

- ProjectWise 2023 Update 6.3 is the **final ProjectWise release to support Oracle databases.**
- Oracle 21c support
- It is advised to consider moving to SQL Server or Bentley-hosted ProjectWise solutions

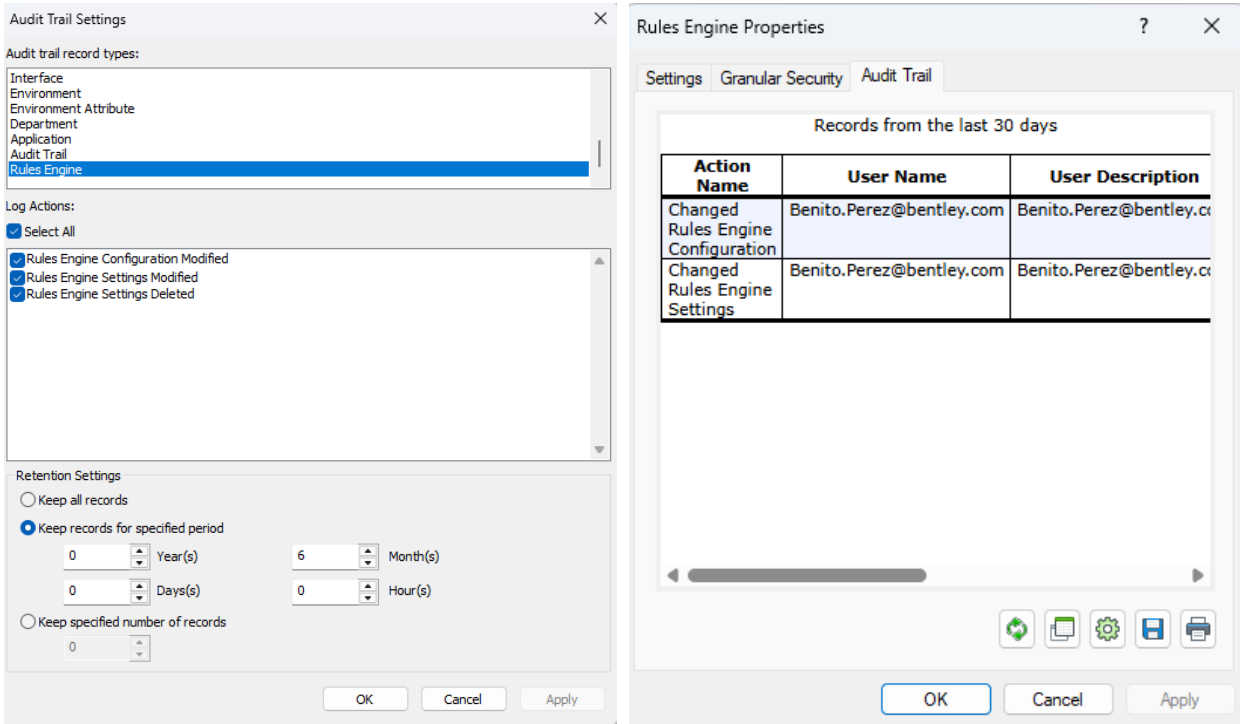

[Release announcement](#)

# ProjectWise Design Integration

## New datasource settings

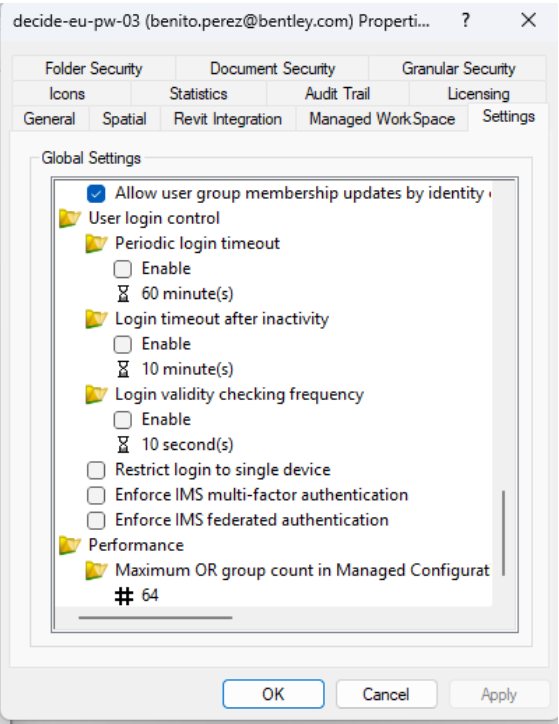

### Audit Trail for changes on WRE

Modifications to WRE saved in the audit trail log

### IMS Authentication options:

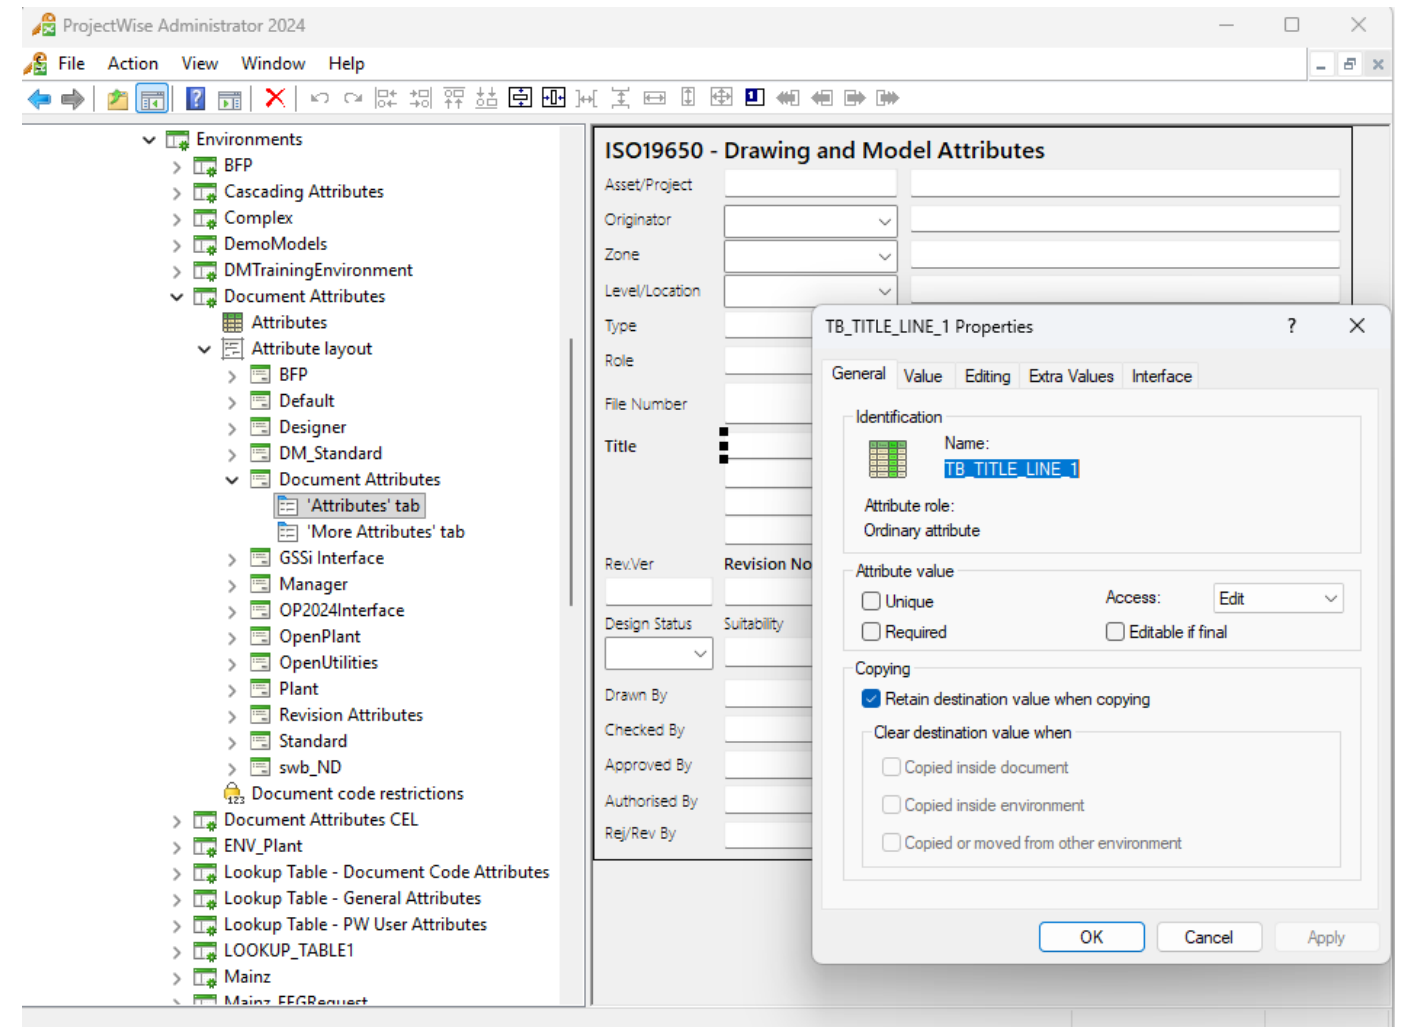

Enforce IMS, Enforce multi-factor authentication

# ProjectWise Design Integration

## New options to retain properties values when copying/pasting

- When selected, the destination attribute will not receive a new value from the source.
- This attribute value may still be updated during copying, if default value or update value options were configured.

# ProjectWise CEL

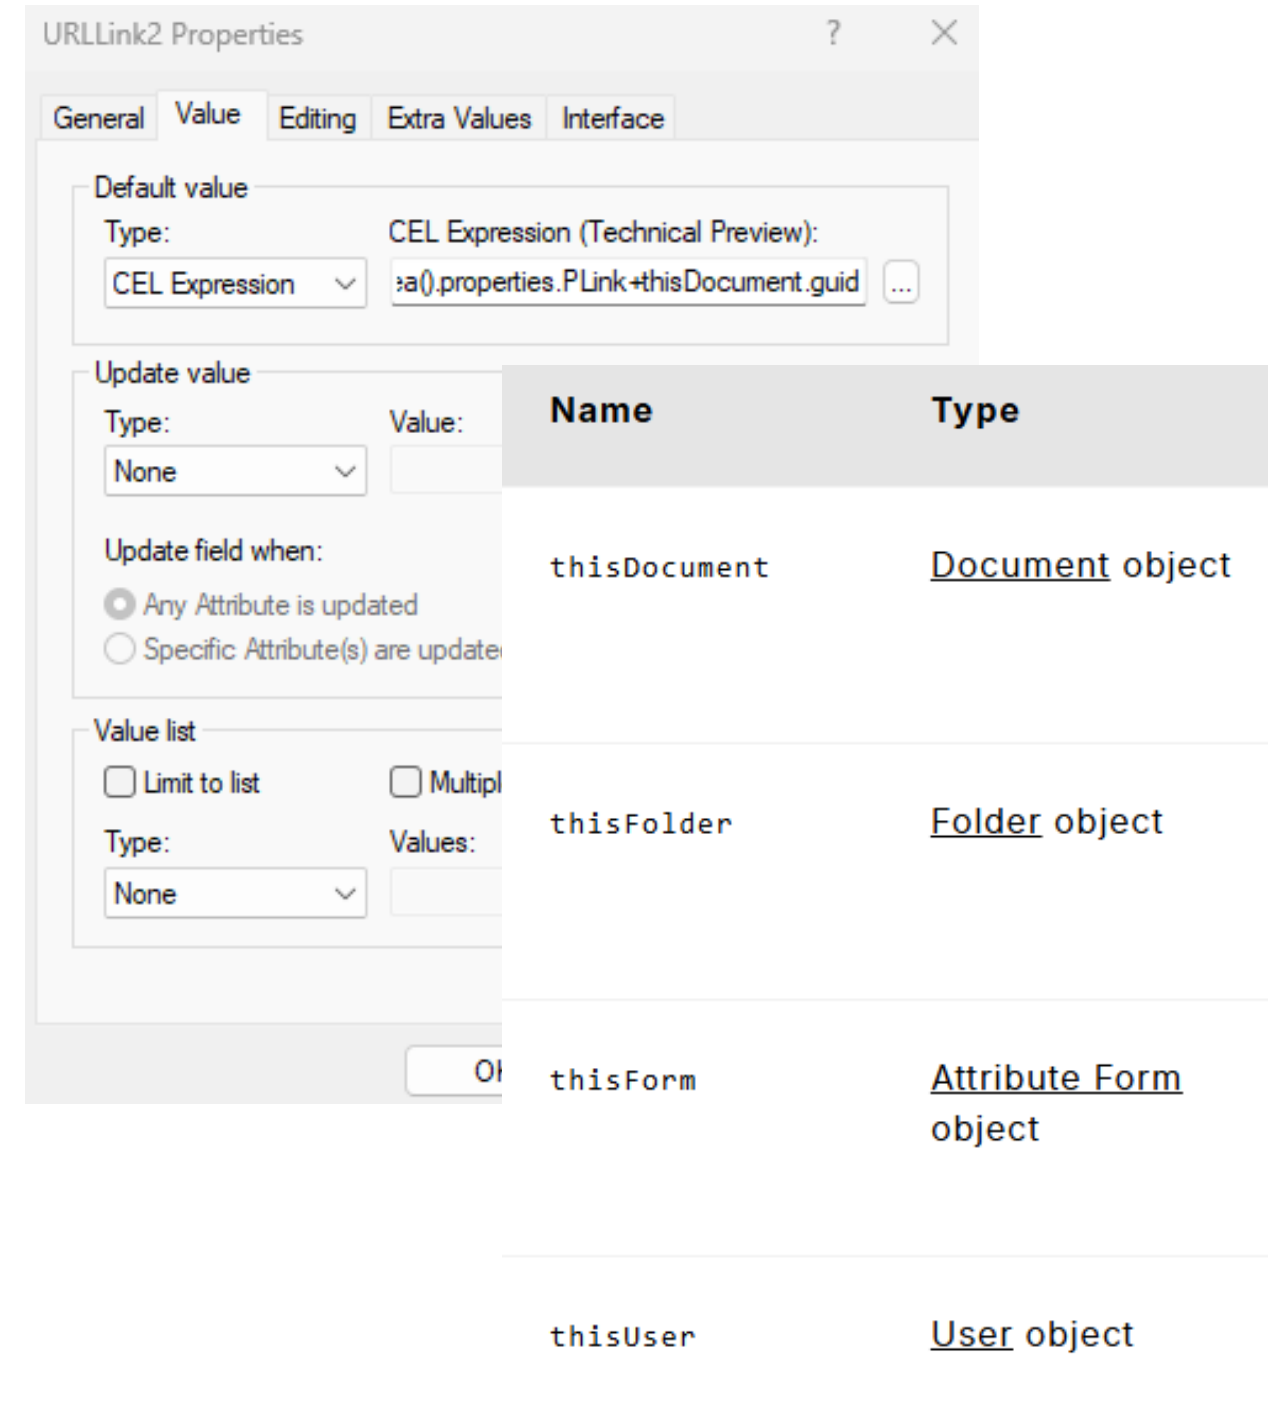

## Common Expression Language

CEL is a next generation replacement for SQL that is designed to provide a convenient set of tools to build configurations

- Simple expression language designed to be safe, portable and with high performance
- Language definition: [GitHub > google/cel-spec](https://github.com/google/cel-spec)
- Bentley Documentation: [ProjectWise Administrator Help > ProjectWise CEL](#)

PW provides "Context" which enables accessing information – thisDocument, thisFolder etc.

- PowerShell for testing

Name	Type
thisDocument	<u>Document</u> object
thisFolder	<u>Folder</u> object
thisForm	<u>Attribute Form</u> object
thisUser	<u>User</u> object

# SQL and CEL comparison

## System variable

The screenshot shows the 'PW\_FILTER Properties' dialog box with the 'Value' tab selected. The 'Default value' section has 'Type' set to 'System variable' and 'System variable' set to '\$VAULT.DESCR\$'. The 'Update value' section has 'Type' set to 'None'. The 'Update field when' section has 'Any Attribute is updated' selected. The 'Value list' section has 'Limit to list' and 'Multiple selection' unchecked, 'Type' set to 'None', and 'Values' empty.

## CEL Expression

The screenshot shows the 'PW\_FILTER Properties' dialog box with the 'Value' tab selected. The 'Default value' section has 'Type' set to 'CEL Expression' and 'CEL Expression' set to 'thisFolder.description'. The 'Update value' section has 'Type' set to 'None'. The 'Update field when' section has 'Any Attribute is updated' selected. The 'Value list' section has 'Limit to list' and 'Multiple selection' unchecked, 'Type' set to 'None', and 'Values' empty.

# SQL and CEL comparison

## Lookup table

The screenshot shows the 'FI\_LEVEL\_CODE Properties' dialog with the 'Value' tab selected. The 'Default value' section has 'Type' set to 'Fixed' and 'Value' set to 'XX'. The 'Update value' section contains the text 'This field can not be triggered because it is a code field.' The 'Value list' section has 'Limit to list' checked and 'Multiple selection' unchecked. The 'Type' is set to 'Select' and the 'SQL SELECT statement' is 'SELECT pw\_code, pw\_description FROM lkp\_fi\_attributes WHERE pw\_filter = 'Level' ORDER BY pw\_sortorder'. A 'Value Type - Select' dialog is overlaid on top, showing the same SQL statement in a text area with 'OK' and 'Cancel' buttons.

## CEL Expression

The screenshot shows the 'FI\_LEVEL\_CODE Properties' dialog with the 'Value' tab selected. The 'Default value' section has 'Type' set to 'Fixed' and 'Value' set to 'XX'. The 'Update value' section contains the text 'This field can not be triggered because it is a code field.' The 'Value list' section has 'Limit to list' checked and 'Multiple selection' unchecked. The 'Type' is set to 'CEL Expression' and the 'CEL Expression' is 'getLookup('LKP.Lookup.DocCodes').filterEquals('PW\_PROJECT',thisForm.FI\_ASSET\_CODE).filterEquals('PW\_FILTER','LVL').select('PW\_CODE','PW\_DESCRIPTION')'. A green arrow points from the SQL dialog in the previous image to this dialog. A semi-transparent box is overlaid on the right side of the dialog with the text 'Enter CEL Expression' and 'Expression:'.

# SQL and CEL comparison

## Stored procedure

The screenshot shows the 'TB\_APPROVED\_BY Properties' dialog with the 'Value' tab selected. The 'Update value' section is set to 'Select' type with the SQL statement: `EXEC dms_ISO19650_action_names '$USER.NAME$', '$EDIT#TRIG_APPROVED$', 'T'`. A 'Value Type - Select' sub-dialog is open, displaying the same SQL statement in a text area. The 'Update field when' section has 'Specific Attribute(s) are updated' selected. The 'Value list' section has 'Limit to list' checked and 'Type' set to 'None'. An 'OK' button is visible at the bottom of the main dialog.

## CEL Expression

The screenshot shows the 'TB\_APPROVED\_BY Properties' dialog with the 'Value' tab selected. The 'Update value' section is set to 'CEL Expression' type with the expression: `getLookup('LKP.Lookup.ProjectUsers').fi`. A sub-dialog titled 'Enter CEL Expression' is open, showing the full expression: `getLookup('LKP.Lookup.ProjectUsers').filterEquals('PW_PROJECT',thisForm.FI_ASSET_CODE).filterEquals('PW_USERNAME',thisUser.name).select('PW_TBNAME')`. The 'Update field when' section has 'Specific Attribute(s) are updated' selected. The 'Value list' section has 'Limit to list' checked and 'Type' set to 'None'. A green arrow points from the SQL dialog in the previous image to this dialog.

# ProjectWise CEL

## Deprecation of SQL statement usage

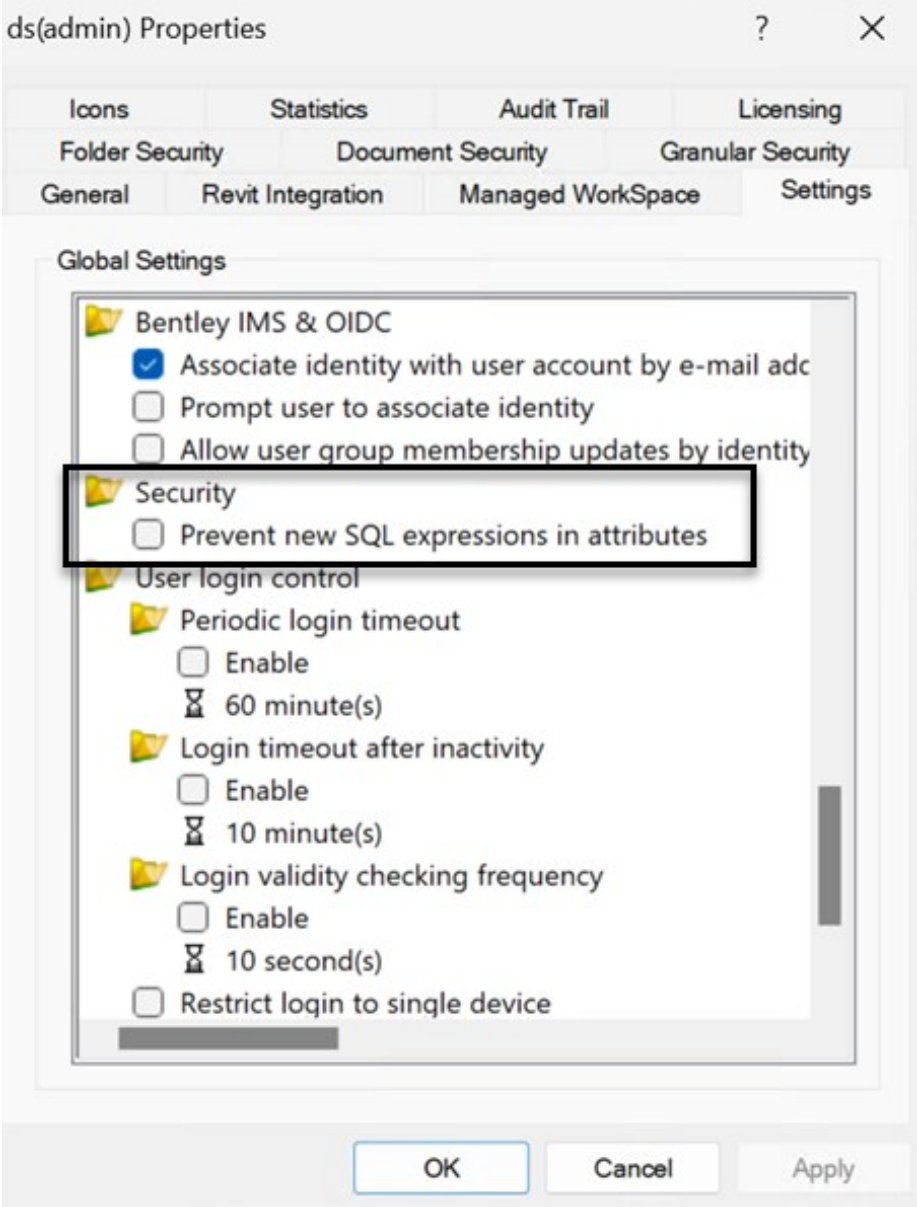

As part of our ongoing commitment to enhance security, maintainability, and configuration flexibility within ProjectWise, we are announcing the deprecation of SQL statement usage in Environment Attribute configuration.

- A new datasource setting, *Prevent new SQL expressions in attributes*, has been introduced.

- Deprecation plan:

May 2026	Early Adoption
August 3, 2026	Soft Transition
<b>November 2, 2026</b>	<b>Final Deprecation</b>

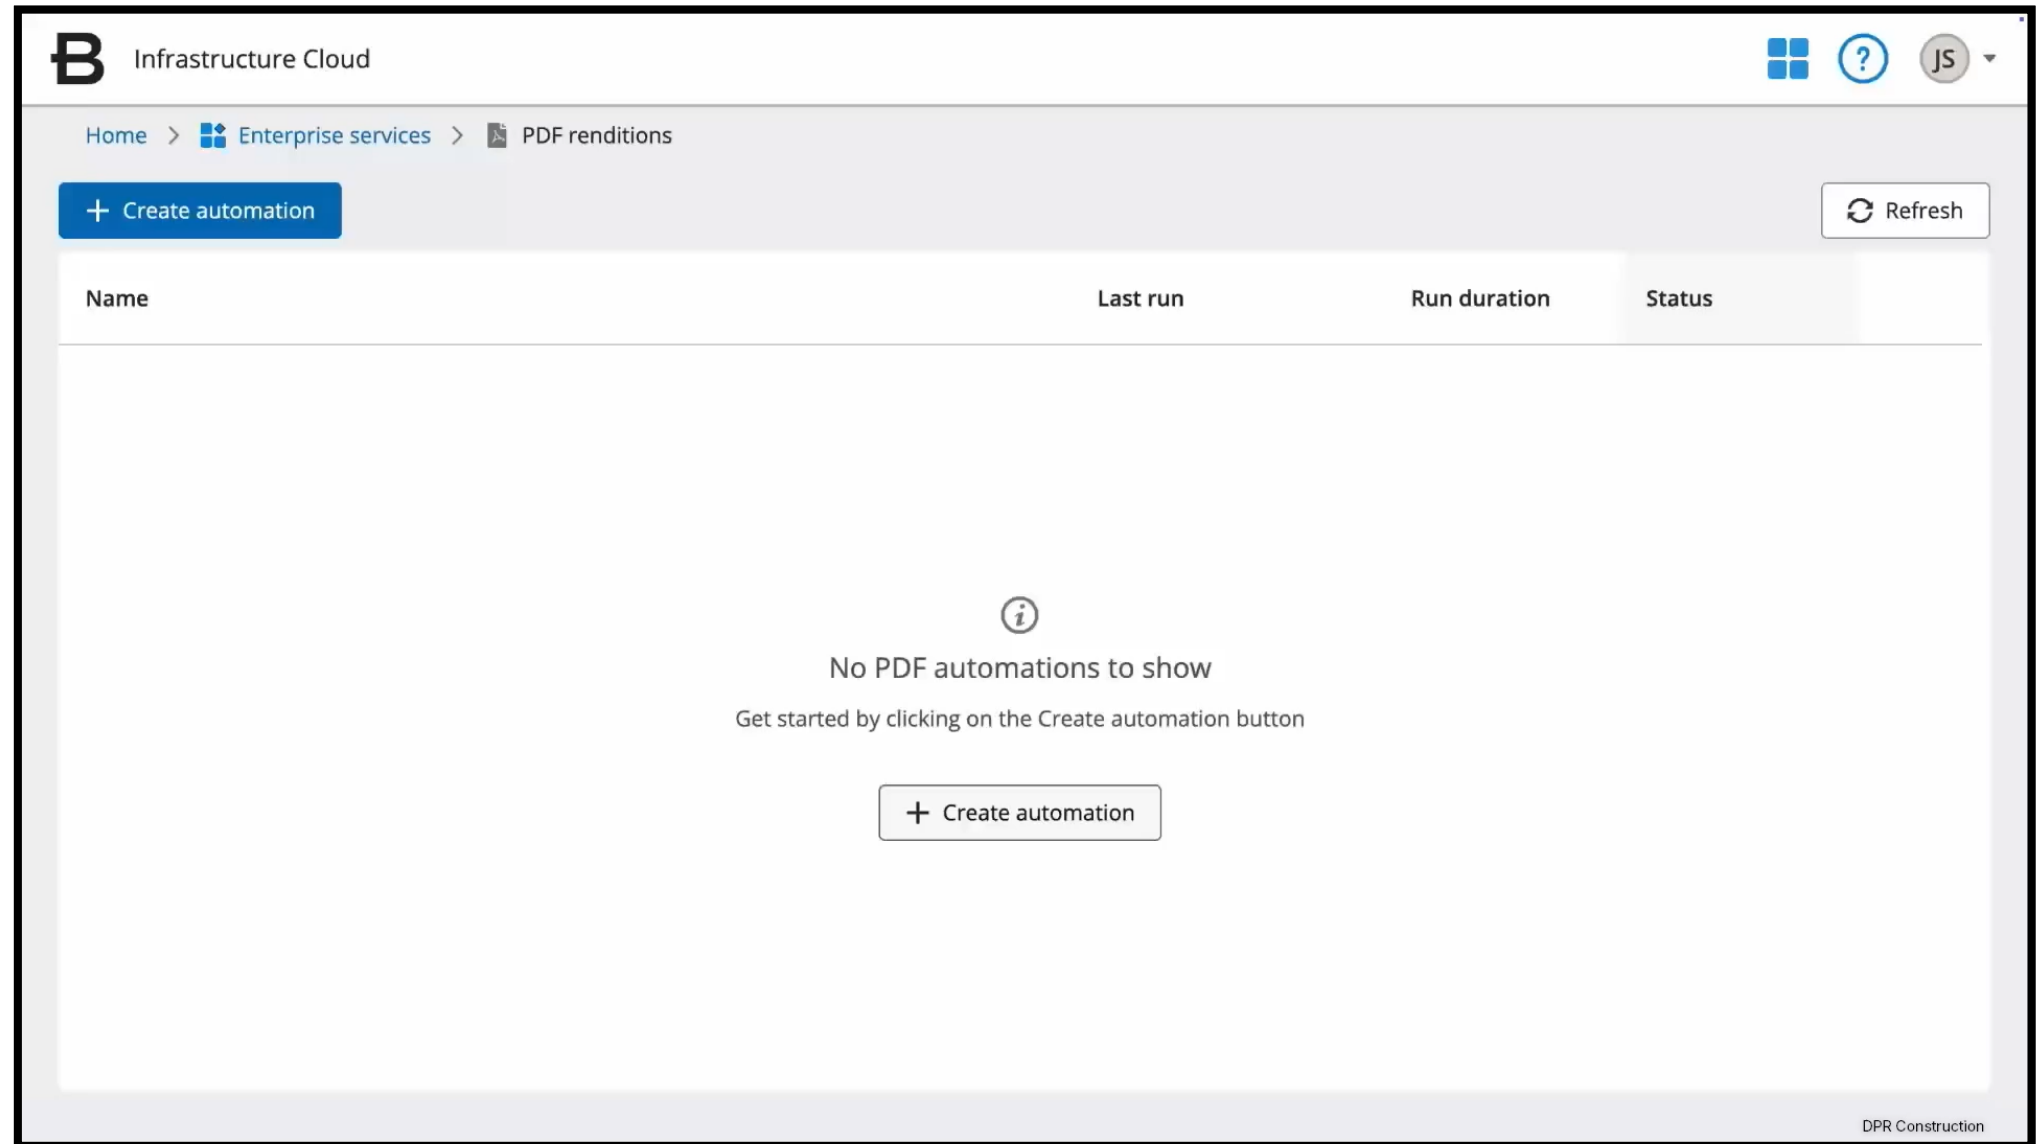

[ProjectWise Cloud Help > ProjectWise Attribute SQL Deprecation and CEL Adoption](#)

# 06 Future

# Cloud rendition service

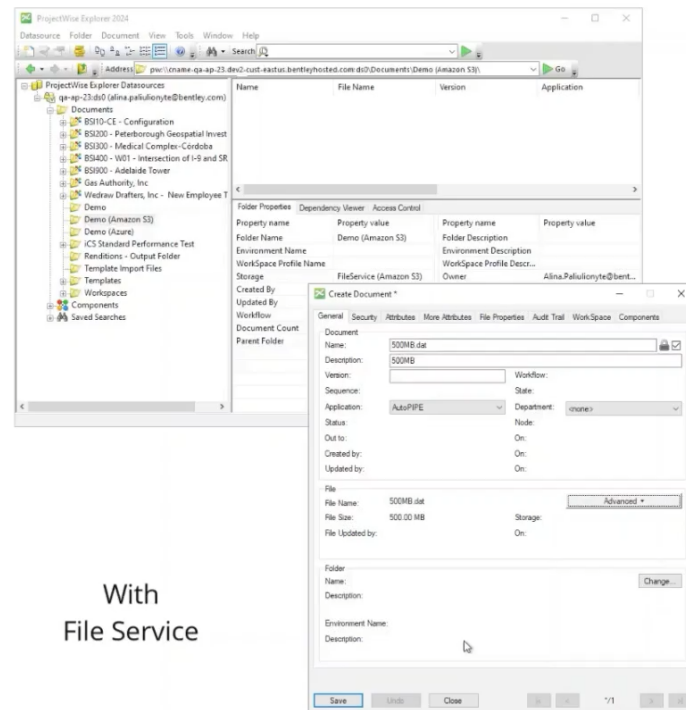

- Objective: simplify (even more) the process of creating PDF from engineering drawings
- Based on events!  
(workflow state change)
- Support existing rendition profiles
- Supports add-hoc and scheduled renditions

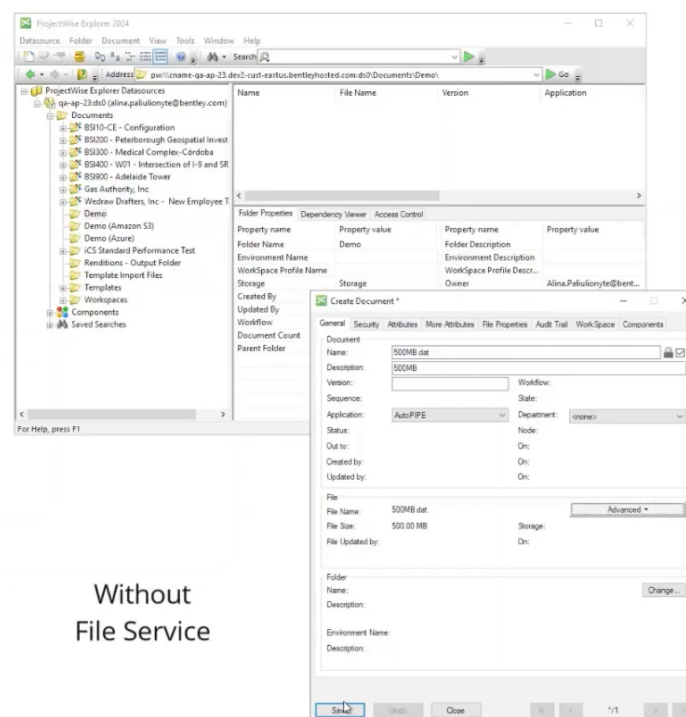

# File Service

500mb file

- Delivers improved scalability and performance
- Initial testing shows significantly reduced file open and check out times

# Documentation

Use the Documentation Assistant to help you find instructions in your own language: [Documentation](#)

The screenshot shows a web browser window with the URL docs.bentley.com/LiveContent/index.html. The page header includes the Bentley logo and 'Documentation'. A 'Documentation Assistant' chat window is open on the right side of the page. The chat interface has a title bar 'Documentation Assistant' and a 'Chat' header. The chat history shows a message from the assistant at 09:08 am: 'Hi there! I have been given access to a selection of Product Documentation. To help you find the most relevant answer, I'll need your Brand, Product and Version.' Below this is a prompt: 'Let's start with the Brand you're using - just pick from the dropdown list below!'. At the bottom of the chat window, there are three dropdown menus labeled 'Brand', 'Product', and 'Version', each with a 'Select a...' option. To the right of these dropdowns is a PDF icon. Below the dropdowns is a text input field with the placeholder 'Ask me anything...' and a send button. The background of the page shows a 'Bentley Software Documentation' banner with a wind turbine image and a 'Popular Software' section with cards for MicroStation and ProjectWise Administration. The footer of the page includes an accessibility icon and a 'Scroll Up' button.
